

EXPLORE THE WORLD

KAYAK / CANOE / STAND UP PADDLE

50 years of commitment for your leisure.

In 1973, François NEVEUX founds the Société d'Exploitation des Procédés Neveux, specialized at the time in the manufacture of concrete sanitation products. At the end of the 70's, Mr NEVEUX launches the Rotomoulage process in France, following the purchase of an American patent and creates several production sites in Lot & Garonne. He develops this process in the sanitation industry to produce septic tanks and derived products but also in many other fields, especially in the nautical industry. Over the years, several production plants were bought by its executives. After several phases of acquisitions and transmissions of companies, **ROTOMOD** becomes the new name of the company and specializes in the design and production of polyethylene canoes and kayaks but also of rotomolded products for subcontracting.

ROTOMOD's development of the canoe-kayak is mainly due to the introduction of Sit On Top (SOT) kayaks, unsinkable, self-draining and safe for the general public, on the French and European markets in the early 1990s.

In 2007, the company **ROTOMOD** takes control of the shareholding of its Ardèche colleague, the company **DAG**. In October 2012, the directors of **ROTOMOD** and **DAG**, in order to give themselves the structural means to assume the specific evolution of the market, decided to merge the two existing structures and thus create a better adapted common production and distribution pole. This resulted in the merger of **DAG** into **ROTOMOD** and thus constituted a new asset for success. **ROTOMOD** now has 2 brands: **RTM** and **DAG**.

With its 2 production sites in Bon Encontre in Lot et Garonne (47) and St jean le Centenier in Ardèche (07), **ROTOMOD** offers a wide range of canoes and kayaks, regularly proposing new products and innovations. The company is also developing its activities in the design sector with the creation and production of furniture and lighting, following the purchase of the **BERGES** lighting company in October 2019.

It also welcomes projects from clients in a wide range of sectors such as agriculture, maritime and highway signage, water treatment, environmental protection, etc. In 50 years, **ROTOMOD** has been able to perpetuate its strategic choices and its investments. The company, which currently employs 80 people, is increasing its production capacity and is fully committed to an eco-responsible approach through self-management of polyethylene recycling.

50 years is the age of maturity, the age at which it is time to take a quick look back so that the next 50 years will be in the continuity of development, innovation, to carry high the values of made in France, of eco-responsibility.

ROTOMOD French company

Watersport specialist

ROTOMOD is a French SME, created in 1973 in Lot et Garonne. Over the years, the company has established itself in the agglomeration of Agen in Bon Encontre.

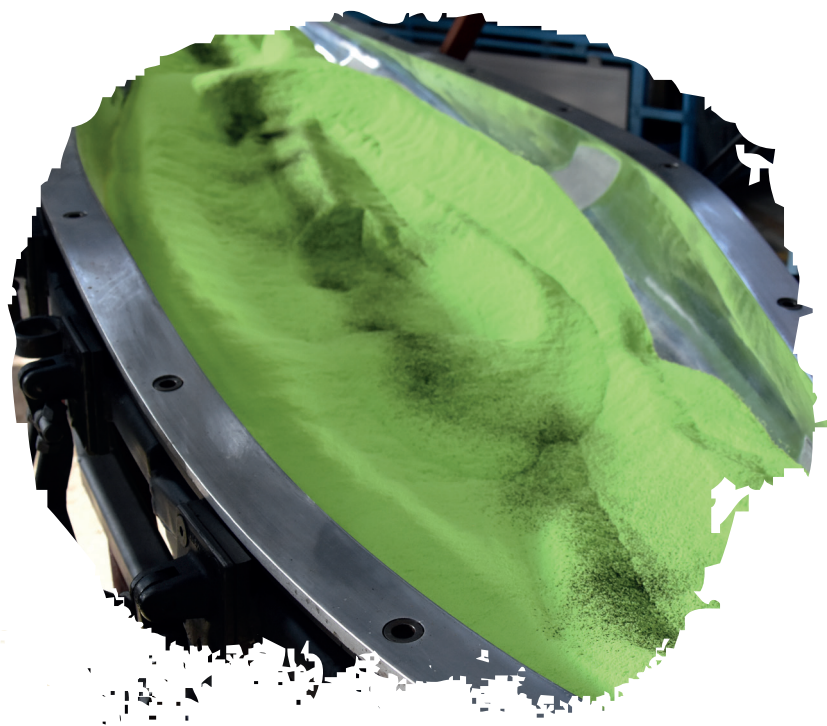

The main activity is the design, production and distribution of polyethylene canoes and kayaks. A part of the activity is dedicated to the production of various customers in the fields of agriculture, road and sea marking, food industry, design and lighting.

In 2007, ROTOMOD gets closer to the company DAG, another flagship of the industry linked to the canoe-kayak activity in France and in Europe. The Ardèche brand joined the Aquitaine company in 2012, its factory becoming the second production site of **SAS ROTOMOD**.

With its RTM and DAG brands, **ROTOMOD** offers a wide range of boats and accessories that meet the needs of professionals, clubs, and paddlers, regardless of their location and level.

MADE IN FRANCE

All our polyethylene canoes, kayaks and stand-up paddles are produced exclusively in France.

Our two factories employ a staff of 70, all of whom are dedicated to producing quality boats.

ROTOMOD is committed to an eco-responsible policy.

Both production sites are equipped with a shredder, enabling the recycling of production surpluses.

ROTOMOD also collects end-of-life boats and other parts from its partners for recycling. The shredded material is then processed to re-create regenerated polyethylene powder, enabling the production of new units for the company's water treatment, construction, agricultural and other marine fittings sectors.

Buy a kayak, canoe, SUP RTM or DAG

- + FRENCH KNOW-HOW, recognized in nearly 82 countries.
- + Acquire a product designed and manufactured in France.
- + Supporting the company's ECO-RESPONSIBLE commitment
- + Supporting ROTOMOD in polyethylene recycling.

ROTOMOD acquires in 2019, 2020 and 2021 the **LABEL MORE, Mobilize to REcycle**, testifying to its commitment to the reprocessing of polyethylene and the integration in its production of regenerated products.

ROTOMOD proposes the RE-PE program, REcycling Polyethylene, to collect free of charge from our customers and users, boats and other polyethylene parts at the end of their life. The objective is to relieve the sites waiting for a solution and to ensure the recycling of these elements.

Acceptez nos (petites) imperfections !

Afin de réduire les émissions de CO2, ROTOMOD s'engage à accepter en fin de ligne de production des produits avec de petits défauts esthétiques n'altérant pas la sécurité, l'usage de ceux-ci. Si votre produit est visuellement imparfait, prenez conscience qu'il témoigne de notre eco-engagement.

Accept our (small) imperfections !

In order to reduce CO2 emissions, ROTOMOD is committed to accepting products at the end of the production line with minor aesthetic defects that do not affect their safety or use. If your product is visually imperfect, be aware that it bears witness to our eco-commitment.

Paname / S

KAYAK CROSS / PLAYBOATING

**SUPER
LINÉAIRE**

NEW MATERIAL

- Stronger on impact,
- Stiff with less material.
- Better abrasion resistance.

A whitewater kayak designed by **Zig Zag** in collaboration with members of the French Slalom team. The **PANAME** is designed for paddlers looking for thrills in competition as well as on the river. A boat designed by the elite but accessible to the greatest number. Speed, fluidity and reactivity are the watchwords of this new model, developed for fun paddling and podium finishes in kayak cross-country.

Its technical features make for easy, high-performance navigation:
Optimized front volume distribution for easy drop-offs, overcoming rollers, landing on jumps or ramps.
Tail cut for fast, stable rotations.
Tight rear end for greater speed and glide.
Low deck height and recessed coaming facilitate kayaker movement and passage through kayak cross doors.

Available in 2 sizes, the **PANAME** and **PANAME S** adapt to the morphologies of male and female athletes looking for a kayak that matches their volume and width, allowing them to express their full potential.

	PANAME	PANAME S
LENGTH	274 cm	274 cm
WIDTH	63.5 cm	60 cm
COCKPIT	88 x 48 cm	88 x 48 cm
WEIGHT	18 kg	18 kg
CAPACITY MAX	70/85 kg	55/70 kg

HIGH-DENSITY POLYETHYLENE**

SQUALY

RIVER INITIATION

The **SQUALY** is a school kayak, allowing the practice of kayak activity from a young age. Adapted to young paddlers, it facilitates the acquisition of kayak technique for fun and safe navigation in calm water and also in rivers during slalom descents of torrents or artificial ponds. (Max Class 2 / passage 3).

The removable keel/drift is an ideal tool, allowing young paddlers to concentrate on propulsion and not on maintaining the direction of the **SQUALY**.

LENGTH	223 cm
WIDTH	57 cm
DEPTH	30.5 cm
WEIGHT	13 kg
CAPACITY MAX	60 kg
COCKPIT	71 x 43 cm

OPTIONS

- Trolley (P65)
- PFDs (P62)
- Paddles (P64)

- 2 front and rear carrying handles
- 2 rear deck safety handles
- Nave plug
- Integrated knee braces
- Seat
- Thermo-comfort backrest
- Front and rear foam stanchions
- Adjustable footrest
- Integrated paddle holder
- 2 water extractors

OPTION :
REMOVABLE FIN
WITH FIXATION

Mad'gic

RIVER INITIATION

The **MAD'GIC** is an entry level polo kayak ideal for clubs, centers, and rental operators. The boat suits both lighter and heavier paddlers.

A stable platform for shooting and tackling. The **MAD'GIC** is also ideal as a pool trainer and for moderate river running.

LENGTH	296 cm
WIDTH	60 cm
DEPTH	31 cm
WEIGHT	16 kg
CAPACITY MAX	95 kg
COCKPIT	84.5 x 50

- Integrated seat
- Notches footrests
- Front and rear handles

OPTIONS

- Trolley (P65)
- PFDs (P62)
- Paddles (P64)

Strim Junior Senior

RIVER INITIATION

Multi-purpose kayak for teenagers and adults who wish to learn and discover kayaking in calm and white water.

Paddling clubs and schools appreciate this kayak with its **CLUB FEATURES**, the bare essentials to get started and discover the kayak.

	JUNIOR	SENIOR
LENGTH	310 cm	315 cm

- Notches footrests
- Carry handles
- Rear buoyancy foam
- Black PE seat

SUPER VERSION = Club version +

- Kneebrace
- Thermo-comfort backrest

OPTIONS

- Trolley (P65)
- PFDs (P62)
- Paddles (P64)

SX 230 285 RIVER INITIATION

The **SX 230** is the ideal kayak for young beginners. Light, compact, easy to handle, children quickly adopt this safe kayak.

The **SX 285** is a SIT-ON-TOP kayak for teenagers and adults designed to get started and progress in whitewater.

The 2 kayaks are fitted with the CARL SYSTEM (Anatomic Length Adjustable Anatomical Scale): between the legs, the paddler is then positioned, fixed as in a kayak sit-in.

	SX230	SX285
LENGTH	230 cm	285 cm
WIDTH	67 cm	71 cm
DEPTH	24 cm	30 cm
WEIGHT	12 kg	22 kg

OPTIONS

- PFDs (P62)
- Paddles (P64)

SUP PE KOA

PE STAND UP PADDLE

KOA is the new polyethylene SUP created by **RTM**. This new concept replaces the SUP PE 10'.

The advantages of this product are its rigidity, avoiding any deformation of the product, its greater volume to increase bearing capacity and its non-slip geometric pad.

Ideal for leisure centres, rental bases and clubs.

Its 3 handles allow to secure the boards together during storage periods.

LENGTH	310 cm / 10'2
WIDTH	90 cm / 35"
DEPTH	24 kg / 53 lbs
VOLUME	230 L
CAPACITY MAX	140 kg

- Elastomer fin
- Integrated handles
- Threaded drain plug
- Front deck bungee

OPTIONS

- SUP Paddles (P69)
- PFDs (P62)
- Dry bags & storage barrels (P66)

SUP 10'6 FUN
